## **A Successful Formula**

In rodents, microinjection of molecules that mimic the neurotransmitters implicated in the transmission of impulses in the areas subjected to the experiment have actually led to a strengthening of the observable reactions of pleasure or satisfaction after the administration of substances with a sugary taste Berridge and Kringelbach, This seems to indicate that the brain mechanisms are the final and most important elements responsible for conscious hedonic feelings, given that as it was previously thought in the same situation and in the same specimens a sugar solution could have caused greater or lesser satisfaction according to the endogenous microstimulations. Rebecca Gowers, The Twisted Heart about a modern literature student immersed in research for her thesis which attempts to establish a link between a murder in a Dickens novel and the unsolved murder of a prostitute in Ann Granger, A Mortal Curiosity about a woman working as a lady's companion who takes a job comforting a mother whose baby has died; 2 in the Lizzie Martin mystery series.
